

EPA ID: CON000801988 Site Name: 120TH AND PECOS PCE

State ID:

Alias Site Names:

1118207 - R8 SDMS

City: WESTMINSTER

Refer to Report Dated:

County or Parrish: ADAMS

State: CC

Report Developed By:

Report Type: OTHER CLEANUP ACTIVITY 001

- ☒ 1. Further Remedial Site Assessment Under CERCLA (Superfund) is not required because:
NFRAP: No further Remedial Action planned
- ☐ 2. Further Assessment Needed Under CERCLA:

Discussion/Rationale:

EPA has tracked the site since 2001; however, in about 2004, the owner/operator undertook a cleanup action with oversight by the State of Colorado, Department of Public Health and Environment (CDPHE). CDPHE reported to EPA in March 2008 that chlorinated solvent tetrachloroethene (PCE) levels had dropped to non-detect or just above State groundwater standards. CDPHE felt the site did not require additional work and closed out the RCRA action in January 2007. EPA believes that the reduction in PCE has reduced the likelihood of exposure to volatile organic compounds (VOCs) via indoor air to people at the nearby daycare, as well as to nearby residents and workers. In addition, migration of VOCs via groundwater to nearby surface water bodies has been mitigated.

The U.S. Environmental Protection Agency (EPA) has determined that no further remedial action by the Federal Superfund program is warranted at the referenced site, at this time. The basis for the no further remedial action planned (NFRAP) determination is provided in the attached document. A NFRAP designation means that no additional remedial steps under the Federal Superfund program will be taken at the site unless new information warranting further Superfund consideration or conditions not previously known to EPA regarding the site are disclosed. In accordance with EPA's decision regarding the tracking of NFRAP sites, the referenced site may be removed from the CERCLIS database and placed in a separate archival database as a historical record if no further Superfund interest is warranted. Archived sites may be returned to the CERCLIS site inventory if new information necessitating further Superfund consideration is discovered.
